

Suprin Man Bajracharya

Bhinchhebal, Lalitpur | +977-9849932566 | bajracharya.suprin@gmail.com

Professional Summary

Experienced full-stack developer with 7+ years across web development and digital banking, specializing in FinTech innovation and digital transformation. Proven ability to design, develop, and deploy scalable web applications that improve operational efficiency and enhance user experience in banking environments. Strong understanding of project lifecycles, stakeholder needs, and secure system design in the banking and financial services industry.

Experience

.NET DEVELOPER | PRABHU BANK LTD | 05TH NOVEMBER 2025 - PRESENT

- Project: MIS Dashboard
 - Designed and developed a full-scale MIS platform using ASP.NET, providing real-time access to multiple financial and customer reports across multiple banking departments.
 - Build a customer 360° View module, consolidating account status, KYC, core banking data, and digital services (credit/debit cards, mobile & internet banking) into a single staff interface via CIF ID lookup.
 - Automated daily KYC compliance notifications to branch managers, streamlining pending update tracking and strengthening regulatory adherence.
 - Delivered a multi-feature IT Monitoring Module including: EOD checklist tracking, a feedback system with automated email responses, and IT asset management - significantly improving operational visibility.
 - Developed Lien amount and Freeze Account features within Core Banking System (CBS) to Central Support Department enabling automated restriction and release of customer funds based on business rules.
 - Designed and enforced a granular Role-Based Access Control (RBAC) system with access list management, ensuring data integrity and least-privilege security across all user roles.
 - Focused on high performance, data security, and role-based access throughout the system.
 - Ensured secure, scalable, and user-friendly UI/UX to support banking operations efficiently.
